Dean Wampler, Ph.D

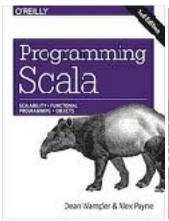

Leadership for Data-Intensive Software Projects

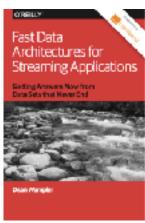

My expertise:

- **Big Data and Streaming Architectures ("Fast Data"):** Spark on Mesos, Kafka, Hadoop and its ecosystem of tools. Streaming Architectures, Machine Learning, some Data Science, SQL and NoSQL databases.
- **Reactive Applications:** Event-driven, scalable, resilient, and responsive applications using the Lightbend Reactive Platform.
- Programming Technology: Functional Programming, Scala, Java, and other languages.
- **Software Development Lifecycle and Team Leadership:** Startup team building. Agile development methods, process improvement, mentoring team members for career growth.

I am an author and speaker with an international reputation.

- Fast Data Architectures for Streaming Applications: (O'Reilly and Lightbend, 2016) A short report on trends in streaming data technologies, how to select them and build systems with them.
- **Programming Scala, Second Edition:** (O'Reilly, 2014) A concise and comprehensive introduction to the Scala programming language.
- Functional Programming for Java Developers: (O'Reilly, 2011) A short introduction to Functional Programming and how the Java developer can benefit from it.
- **Programming Hive:** (coauthor O'Reilly, 2012) A comprehensive guide to Hive, the SQL query environment for Hadoop.
- Industry Conference Speaker and Co-organizer: Strata + Hadoop World, ScalaWorld, Scala Days, GOTO, StrangeLoop, QCon, Big Data Techcon, Reactive Summit, TechMesh, AOSD, OOPSLA, and others.

Experience

VP, Fast Data Engineering

formerly **Architect for Big Data Applications and Services, Office of**the CTO

Lightbend

International

November 2013 - Present

Created and drove the product and technical strategy for Lightbend's Big Data and Fast Data products and services.

- Developed the technical strategy of using <u>Apache Spark</u> on <u>Apache Mesos</u> as a next generation, Big Data and "Fast Data" (Streaming) platform. Expanded the strategy with <u>Kafka</u>, <u>Flink</u>, and other tools into <u>Lightbend Fast Data</u> <u>Platform</u>.
- Worked with Business Development colleagues to make Lightbend an official partner with <u>Mesosphere</u> responsible for products and services around Apache Spark and <u>Akka</u> on Mesosphere DC/OS.
- Worked on the technical details of partnerships with other major vendors, including IBM, Confluent, and Databricks.
- Co-developed the technical strategy for hosted services based on the <u>Lightbend</u> <u>Reactive Platform</u>.
- Contributed code to Spark, primarily in the area of Mesos integration.
- Joined Sales on pre-sales engagements with potential customers.
- Consulted with customers on Big/Fast Data strategies and application architectures.
- Wrote the two-day Spark training course offered by Lightbend.
- Wrote white papers, conducted webinars, and spoke at numerous conferences on our technical strategy and the Big/Fast Data landscape.
- Member, Program Committees: Strata + Hadoop World New York, London, and Singapore, 2014-2017, GOTO Chicago 2014-2017, Scala Days 2015-2017, Reactive Summit 2016-2017, GOTO Aarhus and Copenhagen 2014, CodeMesh/TechMesh London 2013 - 2014, and Big Data Everywhere 2014.

Owner and Principal Consultant

Concurrent Thought

International

April 2013 - November 2013

Consulting on "Big Data" Analytics with Hadoop and Related Tools, Functional Programming with Scala and other languages, Agile software development practices.

- Mentored Cigna Insurance as they built out their first Hadoop clusters and implemented the first applications on them. Developed Scalding (Scala), Hive, and Java/Python MapReduce applications for analytics and machine learning at scale.
- Mentored clients who are transitioning to Functional Programming using new languages, such as Scala, or older languages, such as Java, Ruby, and Javascript.
- · Mentored clients adopting Agile software development.
- Co-author of Get2Know the Hadoop Ecosystem (O'Reilly, forthcoming).
- Co-organizer of the Chicago Hadoop Users Group.

Principal Consultant

Think Big Analytics •

April 2011 - April 2013

International

Consulting on "Big Data" Analytics with Hadoop and Related Tools.

- Founder of *Think Big Academy*, the training division of *Think Big Analytics*.
 Developed and delivered courseware on the Hadoop ecosystem, MapReduce programming in Java and Scala (Scalding), Hive, and Pig.
- Implemented Hadoop-based data warehouse applications for clients in the fields of Internet services, genetics, e-commerce, and government.
- Author, <u>Functional Programming for Java Programmers</u> (O'Reilly, July 2011).
- Co-author, Programming Hive (O'Reilly, October 2012).
- Creator of the open-source project, Stampede.
- Organizing Committee member, OSCON 2011-2012, StrangeLoop 2011-2013, LambdaJam 2013, and GOTO Aarhus 2012.
- Co-organizer of the Development Languages, Practices, and Techniques "stage" at Agile 2011.
- Co-organizer of the FREECO @ Onward! 2011: International Workshop on Free Composition.
- Cloudera Certified Hadoop Professional.

Senior Software Engineer

DRW Trading Group
Chicago, IL

November 2009 - March 2011

Development of infrastructure software.

- Developed scalable, high-performance data collection and visualization applications for enterprise monitoring systems (Scala, JavaScript, Ruby, MongoDB).
- Developed a high-performance, highly-reliable appliance for network traffic capture and analysis (Linux Kernel, C, Ruby, JavaScript).
- Developed IT management and reporting applications (Ruby on Rails).
- Co-guest editor for the IEEE Software special issue on "Multiparadigm Programming" (Sept./Oct. 2010).
- Member of the organizing committee for Commercial Users of Functional Programming (Oct. 2010).
- Co-organizer, "Scala Summit" at OSCON 2010 (July).
- Visiting Faculty, Loyola University Chicago, Pragmatics of Industrial Software Development (Fall 2010).

Senior Trainer, Mentor, and Consultant

Object Mentor

Chicago, IL

July 2006 - October 2009

Training, mentoring, and consulting on Object-Oriented, Functional, and Aspect-Oriented Programming (OOP, FP, and AOP), Agile Methods, Scala, Enterprise Java, Ruby, C/C++, and C#.

- Co-author of <u>Programming Scala</u> (O'Reilly, Sept. 2009).
- Developed and delivered courseware and conference talks on OOP, FP, AOP, Test-Driven Development (TDD), Refactoring, Agile techniques, Scala, Java, C++, Ruby, Polyglot and Poly-paradigm Programming, and craftsmanship.
- Mentored clients on design, XP/agile methods, corporate agile transitions (Agile in the Large), Enterprise Java, C/C++, Ruby, Scala, and C#.
- Founded the open-source project, <u>Aquarium</u>, an AOP toolkit for Ruby.
- Founder of the Chicago-Area Scala Enthusiasts (CASE) user group.

Principal Consultant Aspect Research Associates	Consultant on Aspect- and Object-Oriented Programming, Enterprise Java, Ruby on Rails, and Agile Methods.			
August 2005 - June 2006	 Architect and team lead for new services using the Spring Framework, Hiberna and other lightweight enterprise Java technologies at an online advertising services provider in San Francisco, CA. 			
	 Contributed to a Ruby on Rails portal project at a major automotive manufacturer. 			
	 Mentored clients on Spring, AOP, and AspectJ. 			
	 Contributed to the Aspect J standard library project. 			
	Speaker at several conferences on AOP and Ruby development.			
Directory of NCG Software Development BridgePort Networks	Convergence Gateway (NCG), telecom SCP/VLR that integrates VoIP and other IP media			
Chicago, IL	Built development team from 2 to 10 members.			
	• Project Management for all BridgePort development teams, using Scrum.			
September 2003 - August 2005	 Participated in business development and requirements gathering. 			
	Software process mentor and implementer.			
	Implemented Enterprise Java components and server tools.			
Site Owner Aspect Programming	Managed advocacy web sites for Polyglot and Poly-paradigm Programming (PPP) and Aspect Oriented Programming/Software Development (AOP/AOSD).			
<u>Polyglot Programming</u>	 Published conference talks and papers on PPP and AOP. 			
July 2003 - Present	 Founded <u>Contract4J</u>, a Java 5 and AspectJ tool that supports <u>Design by Contract</u> in Java. 			
	Founded <u>Aquarium</u> , an AOP library for Ruby			
Sr. Product Manager <u>IBM/Rational Software</u>	Senior Product Manager for the J2EE support in Rational XDE, a modeling and patternsoriented development tool hosted in <u>Eclipse</u> .			
Redmond, WA	Specified feature set for J2EE and Java Web Services support in XDE.			
January 2002 – August 2003	 Participated in whole-product strategies for product evolution and other marketing activities. 			
,	 Worked with Rational and IBM customers and IBM to understand their development needs and to evolve XDE to support those needs. 			
	Researched AOP and advocated AOP support in XDE.			
Software Architect Powerhouse Technology	Software Architect for Powerhouse's <i>Pinpoint</i> technology for routing wireless telephone calls over the Internet to WiFi-enabled handsets.			
Seattle, WA	 Developed the network security architecture, utilizing IPSec, firewalls, proxies, etc. 			
January 2001 - September 2001 (Predecessor of BridgePort Networks.)	 Explored conflicts between Internet standards for Voice over IP (VoIP), security (IPSec), and Network Address Translation (NAT). Designed solutions. 			
,	 Participated in requirements discovery and definition. 			
	 Developed J2EE based administration services and network architecture 			
	 Contributed to business-development and venture capital initiatives. 			

Systems Design Engineer Mercata Bellevue, WA	Led the Advanced Development Team that investigated and implemented new technologies for Mercata, to improve Mercata's e-commerce site and to support corporate objectives for new business initiatives.			
November 1999 - December 2000	• Team Lead for Mercata Marketplace [™] , a self-service portal for third-party			
	 Implemented and maintained Mercata's web site for shoppers using WAP phone and Palm™ devices, using the BroadVision One to One™ e-commerce platform. 			
	 Coauthored U.S. Patent applications for enhancements to Mercata's proprietary Group Buying technology. 			
	 Participated in business development initiatives with Wireless and Broadband partners. 			
	 Investigated Wireless and Interactive TV (iTV) technologies. 			
Software Development Manager Sequel Technology Corporation	Managed teams developing the user interface and Internet-Protocol (IP) monitoring and filtering technology for Sequel's Internet Resource Manager™ (IRM).			
Bellevue, WA	 Led effort to develop next-generation Java and web-based user interface. 			
January 1999 - October 1999	 Contributed to requirements discovery, system architecture and design. 			
Software Architect Global Mobility Systems (now part of OpenWave) Bellevue, WA	Project Lead and Architect for the second-generation Mobility Operating Environment ™ (MOE), a three-tier, client-server, web-based system for advanced wireless telecom services. • Participated in requirements discovery.			
	 Implemented user-interface and server components in DHTML and Java. 			
April 1998 - January 1999				
Staff Software Engineer Applied Microsystems Corporation	Project Lead and Architect for a new user interface for an existing source-level debugger product line.			
Redmond, WA	 Led requirements gathering, architecture, design, and implementation. 			
February 1995 - April 1998	 Developed a reusable C++ component framework for debugger-type applications based on the Galaxy Application Environment™ from Visix Software. 			
	 Designed a cross-platform user interface that supported Windows and X11/ Motif design guidelines and exploited the principles of effective human- computer interaction (HCI). 			
	 Promoted use cases as a tool for driving quality assurance (QA) activities. 			
	 Mentored other engineers in object-oriented (OO) methods. 			
	Supervised a small development team.			
Software Engineer III ATL Ultrasound, Inc.	Developed user-interface and system-diagnostics software for real-time medical ultrasound system, the Ultramark 2000 $^{\text{TM}}$.			
Bothell, WA	 Pioneered the use of object-oriented methods and C++ at ATL. 			
June 1991 - February 1995	 Developed diagnostic user interface "panels" for technicians, customers, and other non-technical users. 			
	 Developed C/C++ software for the VxWorks and iRMX operating systems and X11 user interfaces. 			
Software Engineer Technical Arts Corporation	Developed user-interface, data-analysis, and system-control software for a real-time, three-dimensional scanning systems.			
Redmond, WA	 Used object-oriented design techniques. 			
January 1990 - April 1991	• Implemented PL/M and C/C++ software for iRMX, UNIX V4.0, and DOS platforms.			

Technologies	
Software Development	 Hadoop, etc. for Stream processing, Data Analytics and Machine Learning: 5 years of experience with the Hadoop and related Big Data tools, including Spark, Hive, Kafka, Mesos, Scalding, and Hadoop MapReduce, using Scala, Python, and Java. Some machine learning with Spark MLlib and Deeplearning4J. Hosted clusters and AWS Elastic MapReduce.
	 Distributed, "Reactive" Programming: 10 years of experience building distributed applications, most recently with <u>Scala</u>, <u>Akka</u>, <u>Mesos</u>, and <u>Hadoop</u>.
	 Functional Programming: 8 years of experience using Scala. Some knowledge of Clojure, Haskell, Erlang, and Scheme.
	 Aspect-Oriented Programming: 10 years of experience. Pioneering work on applications of AOP to the full development life cycle. Founder of <u>Aquarium</u>, an open-source AOP toolkit for Ruby and <u>Contract4J</u> for <u>Design by Contract</u> in Java.
	 Object-Oriented Programming: 25 years of experience using many OOP languages (Scala, Java, JavaScript, Ruby, C++).
	• Software Life-cycle : 8 years of experience with <i>XP, Lean,</i> and <i>Scrum,</i> Test-Driven Development (TDD) and Refactoring, Scaling Agile to Large Organizations.
	 Languages: Scala, JavaScript, Ruby, Java, C/C++, Bash and *nix tools, HTML, XML, CSS, plus some Clojure, Python, Erlang, Scheme, C#, and Perl.
	• Data Stores: Hadoop, MySQL, Oracle, some HBase and Cassandra.
	• Operating Systems: Linux shell and some kernel programming. Mac OS X user.
	 Other: Concurrency, multi-platform portability, real-time and performance issues.
Management	 Project Management: XP, Lean, and Scrum, agile transitions for large organizations, resource and people management, scheduling and planning, team mentoring.
	 Technology Trends: Awareness and evaluation of technology and business trends relevant to team objectives.
	 Product Management: Technical and product marketing, business partnerships.
	• Communications: Published author, frequent public speaker.
Internet and Telecom	 Internet Standards: Voice over IP (VoIP), IPSec protocols, Network Address (and Port) Translation (NAT/NAPT), DNS, etc.
	• Telecom : SS7 signaling protocols.
	• Wireless LANs: 802.11 ("Wi-Fi") wireless LAN protocols.
User-Interface Technology	Date Visualization: JavaScript visualizations of real-time data.
G.	 Human Factors: Effective presentation of information, visual clarity.
	 UI Design: For technical and non-technical users, for web and "rich-client" applications.

Education			
Ph.D., Theoretical Physics University of Washington 1989	 Studied rare decay processes in atoms and nuclei. Developed numerical models of these processes using object-based methods and VAX FORTRAN. 		
MS, Theoretical Physics University of Virginia 1985	Studied the structure of protons and neutrons in atomic nuclei.		
BS, Physics University of Virginia 1982	Minor in Mathematics.
